INDEX TO VOLUME I.*

A

Academy of Sciences, National, meeting at Washington, 493.
Acoustics, researches in, Mayer, 81.
Adams, F. D., new alkali hornblende and titaniferous andradite, Ontario, 210.
Adams, G. I., extinct Felidæ of North America, 419.
Agricultural Experiment Stations of the Univ. of California, report, 158.
Air, composition of expired, Billings, Mitchell and Bergey, 154.
Algebra, Hall and Knight, 328.
of Quantics, Elliott, 328.
America, Geol. Society of, Philadelphia Meeting, 147.
Aneroid, curl, Barus, 115.
Arctic Discoveries, Greely, 403.
Atom, its relation to the charge of electricity carried, Thomson, 140.
Atoms, ions and molecules, color relations, Lea, 405.
Avery, E. M., School Physics, 57.

B

Bailey, L. H., Plantbreeding, 151.
Barrington-Brown, rubies of Burma, 64.
Barus, C., counter-twisted curl aneroid, 115.
Bashore, H. B., glacial gravels in Lower Susquehanna Valley, 281.
Becker, G. F., gold fields of the S. Appalachians, 57.
Beecher, C. E., morphology of Triarthrus, 251; comparative morphology of the Galeodidæ, by Bernard, 491.
Bell, R., rising of land around Hudson Bay, 219.
Bernard, H. M., comparative morphology of the Galeodidæ, 491.
Bibliotheca Zoologica II., 77.
Billings, composition of expired air, 154.
Binary star, 70 Ophiuchi, 159.
Bitumen, Trinidad, Peckham and Linton, 193.
Bonney, T. G., Charles Lyell and Modern Geology, 322.
Botanical Works—
Australian Fungi, McAlpine, 324.
Kryptogamen-Flora von Deutschland, etc., Rehm, 492.
Lithothamnion, Norwegian forms, Foslie, 153.
Mosses and Ferns, Campbell, 72.
Mycetozoa, British, Lister, 153.
Phycotheca Boreali-Americana, Collins, Holden and Setchell, 73, 493.
Plantbreeding, Bailey, 151.
Seaweeds, Study of, Murray, 74.
Botany—
Cell-wall, modifications, Van Wisselingh, 152.
Characeæ of America, Allen, 492.
Cyperaceæ, Holm, 348.
Pleiotaxy in the androecium of Epidendrum cochleatum, Mead, 72.
Reis-Brand und der Setaria-Brand, Brefeld, 325.
Soja bean, tubercles on roots, Kirchner, 151.
Sphærotheca Castagnei, die Entwickelung des Peritheciums bei, 326.
Sugar in root of beet, Maquenne, 152.
Sugar-cane, propagation, Wakker, 324.
Boulenger, G. A., catalogue of Perciform Fishes, 397.
Briggs, L. R., Röntgen rays, 247.
British Museum Catalogues, 396, 397, 398.
Browning, P. E., interaction of chromic and arsenious acids, 35.
Byerly, W. E., Differential Calculus, 328.

C

Campbell, D. H., Structure, etc., of Mosses and Ferns, 72.
Canada Geol. Survey, 150, 490.
Carmichael, N. R., Röntgen rays, 247.
Cathetometer, new, Wadsworth, 41.
Cathode photography, Trowbridge, 245.
ray phenomena, Elster and Geitel, 139.
rays and their effects, Wright, 235.
See *Röntgen rays* and *X-Rays*.

* This Index contains the general heads, Botany, Chemistry, Geology, Minerals, Obituary, Rocks, and under each the titles of Articles referring thereto are mentioned.

Chalmers, R., Pleistocene marine shore lines, 302.
CHEMICAL WORKS—
Chemical Experiments, Williams, 317.
Laws, Proofs of, Cornish, 52.
Solubilities, inorganic, Dictionary, Comey, 484.
Chemistry of Fatty Compounds, Whiteley, 53.
Inorganic, Turpin, 317.
Organic, Cohn, 53.
Copper Smelting, Peters, 54.
Fermentations, Schützenberger, 484.
Molekulargewichtsbestimmung, Fuchs, 53.
CHEMISTRY—
Ammonia, compounds of metallic salts with, Wiede and Hofmann, 393.
Argon, determination in air, Schloesing, 49.
Argon and helium, properties, Rayleigh, 315.
Cæsium and zirconium, double fluorides, Wells and Foote, 18.
Caffeine, synthesis, Fischer and Ach, 316.
Chromic and arsenious acids, interaction of, Browning, 35.
Cyanogen, volumetric determination, Denigès, 50.
Elements, relations between atomic weights of, Lea, 386; classification, Lea, 405.
Gas, action of heating on detonating, V. Meyer and Raum, 138.
Hydrazine, free, de Bruyn, 316.
Hydrogen peroxide, Traube, 136.
Ions, etc., color of, Lea, 405.
Manganese carbide, Moissan, 392.
Nitrogen, absorption by lithium, Deslandres, 138.
Orthophthalic acids, two, Howe, 485.
Oxygen and hydrogen, atomic weights, Thomsen, 316.
Platinum and potassium, double halides, Herty, 315.
Selenious and selenic acid, iodometric determination, Gooch and Peirce, 31.
Selenium, gravimetric determination, Peirce, 416.
separation from tellurium, Gooch and Peirce, 181.
Silicates, decomposition by boric acid, Jannasch and Heidenreich, 139.
Strontium compounds, Sörensen, 392.
Sulphide of nitrogen, Clever and Muthmann, 391.
Sulphur, molecular weight, Orndorff and Terrasse, 483.
Titanium, properties, etc., 52.
Water, constitution of, Brühl, 138.
Chester, A. H., Dictionary of Mineral Names, 401.
Chittenden, H. M., Yellowstone National Park, 327.
Clark, W. B., Potomac river section of Atlantic Coast Eocene, 365.
Clerke, A. M., the Herschels and Modern Astronomy, 76.
Cohn, L., Organic Chemistry, 53.
Color relations of atoms, ions and molecules, 405.
Colors, analysis of contrast, Mayer, 38.
Comet of 1843 I., Kreutz, 75.
Cornish, V., Proofs of Chemical Laws, 52.
Corrigan, S. J., Constitution of Gases, etc., 328.
Crookes tubes, Hutchins and Robinson, 463.
Crystal forms, drawing of, Moses, 462.
Crystallization, emission of light during, Bandrowski, 51.

D

Davis, W. M., lava beds at Meriden, Conn., 1.
Davison, C., diurnal periodicity of earthquakes, 402.
Dielectric constants, determination, Nernst, 317.
resistance, Drude, 318.
Dubois, E., climates of the Geological past, 62.
Work on Pithecanthropus noticed, 475.

E

Earthquakes, diurnal periodicity, Davison, 402.
Elasticity, modulus determined, Mayer, 81.
Electric arc, temperature of carbons of, Wilson and Gray, 394.
shadows, duration, 141.
waves, double refraction, Mack, 140.
interference, von Lang, 394.
refractive index and reflective power of water and alcohol, Cole, 318.

Electricity, discharge through gases, 140.
Electrostatic and electromagnetic units, ratio of, Hurmuzesca, 140.
Elliott, E. B., Algebra of Quantics, 328.

F

Fishes, Perciform, Catalogue, Boulenger, 397.
Foote, H. W., double fluorides of cæsium and zirconium, 18; pollucite, mangano-columbite and microlite in Maine, 457.
Forbes, E. H., chrysolite-fayalite group, 129; epidote, Huntington, Mass., 26.
Franklin, W. S., Physics, 319.
Fuchs, G., Molekulargewichtsbestimmung, 53.

G

Gas Manufacture, text book on, Hornby, 317.
Gases, Constitution of, etc., Corrigan, 328.
Geological Biology, Williams, 63.
Geological Reports and Surveys—
Canada, 150, 490.
Iowa, 1894, 149.
Kansas, 489.
Missouri, 1894, 149.
New Jersey, 1894, 60.
New York, 1893, 61.
Norway, 399.
Pennsylvania, 488.
United States, 15th annual, 487, 16th annual, 142.
recent publications, 144; topographical maps, 488.
Geological Society of America, Philadelphia Meeting, 147.
Geology—
Bearpaw Mts., Mont., petrography, Weed and Pirsson, 283, 351.
Cerrillos coalfield, Stevenson, 148.
Cretaceous paleontology of Pacific Coast, Stanton, 320.
section at El Paso, Texas, Stanton and Vaughan, 21.
Eocene of Atlantic Coast, Potomac river section of, Clark, 365.
Felidæ of North America, extinct, Adams, 419.
Fossil Fishes in British Museum, catalogue, Pt. III, Woodward, 396.
Galeodidæ, comparative morphology, by Bernard, Beecher, 491.
Geological history of the Chautauqua Grape Belt, Tarr, 399.
Geological Past, climates of, Dubois, 62.
Geology of Green Mts. in Mass., Pumpelly, Wolff and Dale, 146.
of the Mercer Mining District, Utah, Spurr, 395.
of the road-building stones of Massachusetts, Shaler, 489.
Glacial gravels in Lower Susquehanna Valley, Bashore, 281.
Glaciation in Pennsylvania, Kümmel, 113.
Gold Fields of S. Appalachians, Becker, 57.
Hudson Bay, elevation of land around, Bell, 219.
Igneous rocks of the Yellowstone, age, Hague, 445.
Jurassic times, climatic zones in, Ortmann, 257.
Lapiés, l'étude des, Chaix, 321.
Lava beds at Meriden, Conn., Davis, 1.
Limestones, oblique bedding in, 398.
Mesozoic plants, catalogue, British Museum, Seward, 397.
Miocene of N. Jersey, mollusca and crustacea, Whitfield, 61.
Niagara Falls, duration of, etc. Spencer, 398.
Pithecanthropus erectus, Marsh, 475.
Pleistocene marine shore lines, Chalmers, 302.
Tapirs, recent and fossil, Hatcher, 161.
Trap Rocks of Conn., Davis, 1; of the Palisades, Lyman, 149.
Triarthrus, morphology of, Beecher, 251.
Wealden, age of, Marsh, 234.
Geometry, Beman and Smith, 328.
Geophysik, Beiträge zur, Gerland, 322.
Glazebrook, R. T., Mechanics and Hydrostatics, 327; James Clerk Maxwell and Modern Physics, 404.
Gooch, F. A., separation of selenium from tellurium, 181; iodometric determination of selenious and selenic acids, 31.
Greely, A. W., Arctic Discoveries, 403.

H

Hague, A., age of the igneous rocks of the Yellowstone, 445.
Harrington, B. J., new alkali hornblende and titaniferous andradite, Ontario, 210.
Harvard College Observatory, 75.
Hatcher, J. B., recent and fossil tapirs, 161.
Herschels and modern astronomy, Clerke, 76.
Hillebrand, W. F., phosphorescence in wollastonite, 323.
Holm, T., Cyperaceæ, 348.
Holman, S. W., Computation Rules and Logarithms, 328.
Holtz machine, influence of light on discharge, Elster and Geitel, 393.
Hornby, J., Textbook of Gas Manufacture, 317.
Hutchins, C. C., Crookes tubes, 463.
Huxley memorial, 249.

I

Ice, plasticity, Mügge, 56.
Illinois State Museum, 150, 398.
Insects, Aquatic, Miall, 249.
Iowa geol. survey, 1894, 149.

J

Jacoby, H., division errors of a straight scale, 333.
Judd, J. W., rubies of Burma, 64; structure-planes of corundum, 323.

K

Kansas, Geol. Survey, 489.
Kümmel, H. B., glaciation in Pennsylvania, 113.

L

Lacroix, A., Mineralogie, 401.
Latitude, determinations in the Hawaiian Is., Preston, 75.
Lea, M. C., Röntgen rays not present in sunlight, 363; relations between atomic weights of the elements, 386; color relations of atoms, ions and molecules, 405.
Liebig, Justus von, Shenstone, 76.
Light, longitudinal, Lenard, 249.
Light-emission power at high temperatures, St. John, 54.
Lighting, Groves and Thorp, 139.
Lightning, globular, Marsh, 13.
Linton, L. A., Trinidad pitch, 193.
Lister, A., British Mycetozoa, 153.
Lithology, Williams, 150.
Littlehales, G. W., form of isolated submarine peaks, 15; problem of finding isolated shoals in the open sea, 106.
London, W. J., Physics, 141.
Lyell, Charles, and Modern Geology, Bonney, 322.
Lyman, B. S., trap rock of the Palisades, 149.

M

Mabilleau, Philosophie Atomistique, 54.
Magnetic declination in Alaska, 1895, Schott, 75.
Magnetismus der Planeten, Leyst, 56.
Marine animals, geographical distribution, Ortmann, 321.
Marsh, O. C., globular lightning, 13; age of the Wealden, 234; Pithecanthropus erectus, 475.
Maxwell, James Clerk, and Modern Physics, Glazebrook, 404.
Mayer, A. M., analysis of contrast-colors, 38; researches in acoustics, 81; Röntgen rays, 467.
McAlpine, D., Australian Fungi, 324.
McLennan, J. C., Physics, 141.
Mechanics and Hydrostatics, Glazebrook, 327.
Melting points of metals, Holmann, Lawrence and Barr, 395.
Merrill, G. P., free gold in granite, 309.
Meteorite, iron, Forsyth Co., N. C., de Schweinitz, 208.
Meteorological Society, New England, 494.
Miall, L. C., Aquatic Insects, 249.
Michel-Lévy, feldspaths dans les plaques minces, 402.
Michelson, A. A., theory of the X-rays, 312.
Mikr. Physiographie der mass. Gesteine, Rosenbusch, 63.
Mineral Names, Dictionary of, Chester, 401.
Mineralchemie, Rammelsberg, 151.
Mineralogie de la France et de ses Colonies, Lacroix, 401.
Mineralogy, Rutley, 401.
Minerals—
Amphibole, alkali, Ontario, 210.
Andradite, titaniferous, Ontario, 210.
Ascharite, 70.

MINERALS—
Chrysolite, 132. Corundum, structure-planes, 323. Crocoite, Tasmania, 389. Cuproiodargyrite, Peru, 70.
Epidote, Huntington, Mass, 26.
Fayalite, Rockport, Mass., 129. Feldspars in thin sections, Michel-Lévy, 402.
Gold in granite, Merrill, 309. Graphite in pegmatite, 50.
Hastingsite, Hastings Co., Ont., 212. Hoeferite, Bohemia, 70. Hortonolite, Orange Co., N. Y., 131.
Jadeite, Thibet, 401.
Kamarezite, Greece, 7.
Lewisite, Brazil, 71. Lossenite, Greece, 71.
Mangano-columbite, Maine, 460. Mauzeliite, Sweden, 71. Microlite, Maine, 461. Monticellite, Magnet Cove, Ark., 134.
Pollucite, Maine, 457.
Rubies, Burma, 64.
Sperrylite, Ontario, 110.
Thaumasite, West Paterson, N. J., 229. Tiffanyite, 72. Tilasite, Sweden, 71.
Wollastonite, Oneida Co., N. Y., 323.
Zirkelite, Brazil, 71.
Missouri geol. survey, 1894, 149.
Molecules and Molecular Theory of Matter, Risteen, 57.
Moses, A. J., drawing of crystal forms, 462.
Murray, G., Study of Seaweeds, 74.

N

New Jersey geol. survey, 1894, 60.
New York Academy of Sciences, vol. xiv, 77.
State geol. survey, 1893, 61.
Nichols, E. L., Physics, 319.
Nies, Crystallography, 402.
North American Birds, Nehrling, 404.

O

OBITUARY—
Bebb, M. S., 78.
Castillo, A. del, 78.
Krueger, 494.
Lawson, G., 78.
Müller, J., 326.
Wachsmuth, C., 250.
Ortmann, A. E., climatic zones in Jurassic times, 257.
Ostwald's Klassiker, 77.

P

Palache, C., crocoite from Tasmania, 389.
Peckham, S. F., Trinidad pitch, 193.
Peirce, A. W., iodometric determination of selenious and selenic acid, 31; separation of selenium from tellurium, 181; gravimetric determination of selenium, 416.
Pendulum observations, Putnam, 186.
Penfield, S. L., chrysolite-fayalite group, 129; thaumasite, West Paterson, N. J., 229.
Pennsylvania, geol. survey of, 488.
Peters, E. D., Jr., Copper Smelting, 54.
Petrography, new term proposed, Pirsson, 150.
Physical Geography, Tarr, 76.
Physics, Nichols and Franklin, 319.
Experimental, London and McLennan, 141.
School, Avery, 57.
Pirsson, L. V. new petrographical term, 150; Bearpaw Mts., Mont. 283, 351.
Pratt, J. H., thaumasite, West Paterson, N. J., 229.
Preston, E. D., latitude determinations, etc., in Hawaiian Is., 75.
Putnam, G. R., pendulum observations, 186.

R

Radiation of a dark body, law of, Wien and Lummer, 56.
Rammelsberg, C. F., Mineralchemie, 151.
Risteen, A. D., Molecules and Molecular Theory of Matter, 57.
Robinson, F. C., Crookes tubes, 463.
ROCKS—
Gabbro in St. Lawrence Co., N. Y., metamorphism, Smyth, 273.
Mica-peridotites, Bengal, Holland, 400.
Monzonite, Bearpaw Mts., 355.
Quartz-syenite, Bearpaw Mts., 295.
Shonkinite, Bearpaw Mts., 360.
Syenite, Bearpaw Mts., 352.
Theralite, Costa Rica, Wolff, 271.
Trachyte, Bearpaw Mts., 291.
Trachytes, Ischian, Washington, 375.
Yogoite, Bearpaw Mts., 355.
Röntgen's discovery, 394.

Röntgen rays, experiments on, Doelter, 319; Goldhammer, 485; Hutchins and Robinson, 463; Mayer, 467; Rowland, Carmichael, and Briggs, 247; Thomson, 318; J. Trowbridge, 245; A. W. Wright, 235.
absorption by chemical compounds, 483; not present in sunlight, Lea, 363; recent work on, 486; theory of, Michelson, 312.
Rosenbusch, Mikr. Physiographie, 63.
Rowland, H. A., Röntgen rays, 247.
Royal Society catalogue of Scientific papers, 327.
Rutley, F., Mineralogy, 401.

S

Scale, division errors of a straight, Jacoby, 333.
Schott, C. A., magnetic declination in Alaska, 1895, 75.
Schweinitz, E. A. de, meteorite from Forsyth Co., N. C., 208.
Shenstone, W. A., life of Liebig, 76.
Smyth, C. H., Jr., metamorphism of a gabbro in St. Lawrence Co., N. Y., 273.
Sound, diminution of the intensity of, with the distance, 487.
Spencer, J. W., duration of Niagara Falls, etc., 398.
Spiders of Burma, Thorell, 398.
Spurr, J. E., Economic Geology of the Mercer Mining District, Utah, 395.
Stanton, T. W., Cretaceous section at El Paso, Texas, 21; Cretaceous paleontology of Pacific Coast, 320.
Stevenson, J. J., Cerrillos coal field, 148.
Submarine peaks, form of, Littlehales, 15.
Sun, presence of carbon and oxygen in, Trowbridge, 329.

T

Tarr, R. S., Physical Geography, 76.
Terrestrial Magnetism, 141.
Tierreich, Schulze, 491.
Turpin, G. S., Inorganic Chemistry, 317.
Trinidad pitch, Peckham and Linton, 193.
Trowbridge, J., triangulation by cathode photography, 245; carbon and oxygen in the sun, 329.

U

United States geol. survey, 15th annual report, 487; 16th annual report, 142; recent publications, 144; topographical maps, 488.

V

Vapors, fluorescence of, Wiedemann and Schmidt, 393.
Vaughan, T. W., Cretaceous section at El Paso, Texas, 21.

W

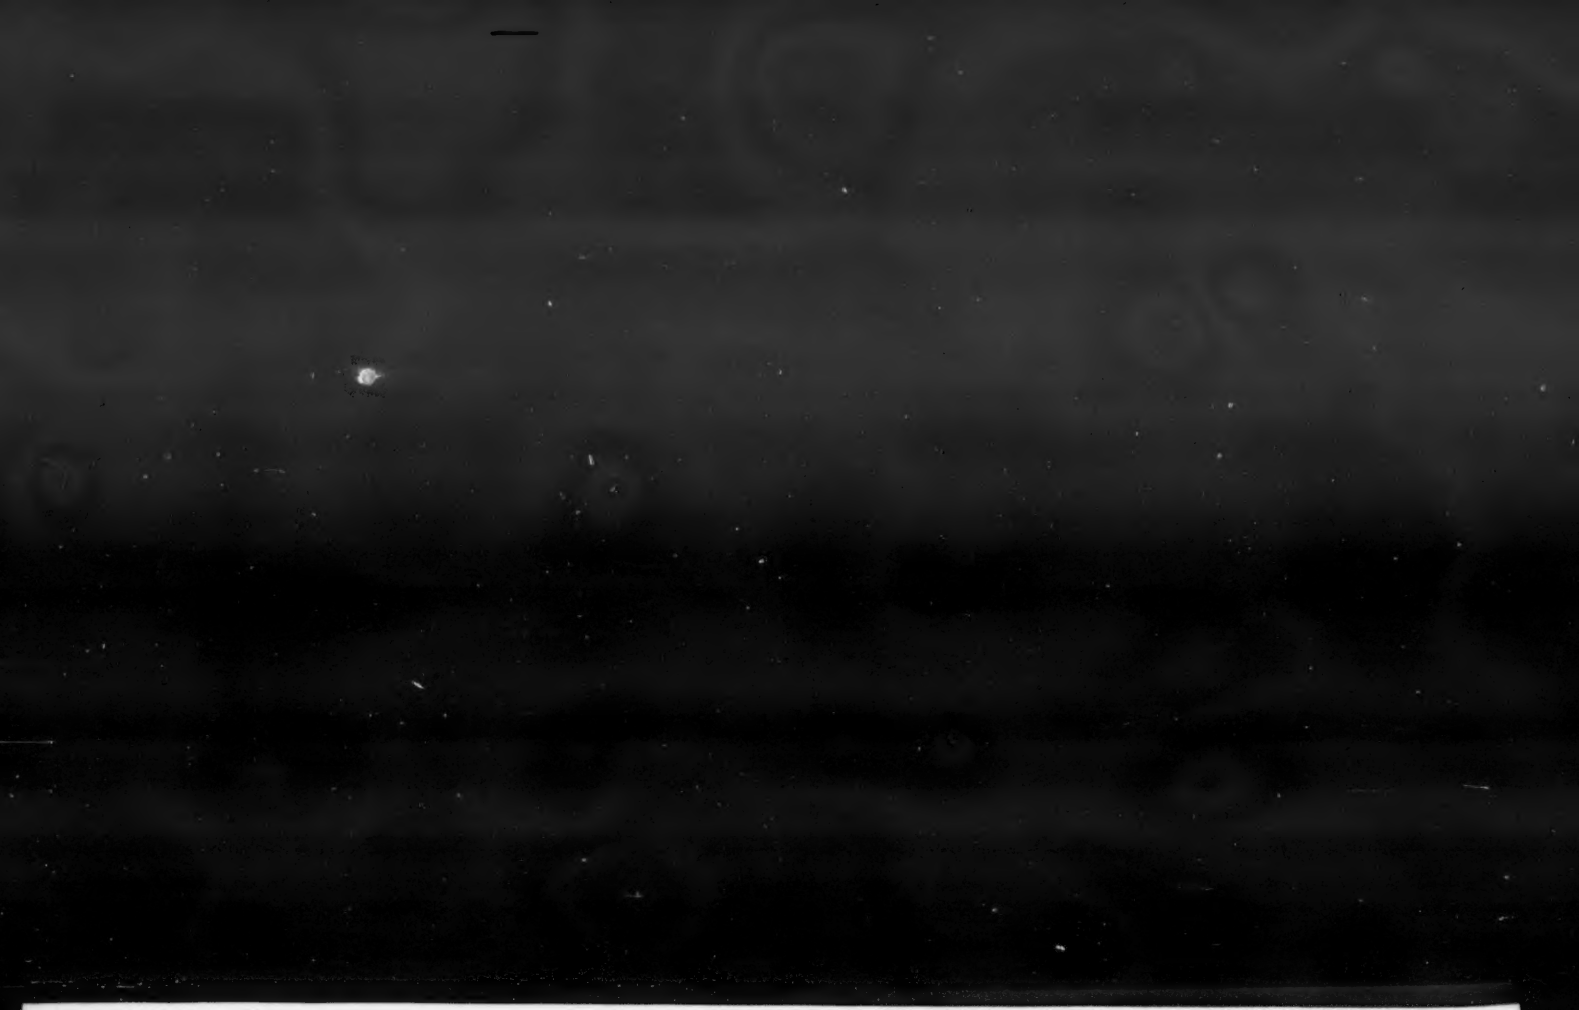
Wadsworth, F. L. O., cathetometer, 41.
Wakker, J. H., propagation of sugar-cane, 324.
Walker, T. L., sperrylite, 110.
Washington, H. S., Ischian trachytes, 375.
Weed, W. H., Bearpaw Mts., Mont., 283, 351.
Wells, H. L., double fluorides of cæsium and zirconium, 18.
Whiteley, R. L., Organic Chemistry, Fatty Compounds, 53.
Whitfield, R. P., mollusca and crustacea of N. Jersey Miocene, 61.
Williams, E. H., Manual of Lithology, 150.
Williams, H. S., Geological Biology, 63.
Williams, R. P., Chem. Experiments, 317.
Wolff, J. E., theralite in Costa Rica, 271.
Woodward, A. S., catalogue of Fossil Fishes, 396.
Wright, A. W., cathode rays and their effects, 235.

X

X-rays, theory of, Michelson, 312.
See *Cathode*, *Röntgen rays*.

Y

Yellowstone National Park, Chittenden, 327.
age of igneous rocks of, Hague, 445.

Z


Zoologisches Adressbuch, 77.
